DASSO XTR EXTERIOR BAMBOO DECKING

Bamboo is one of the fastest-growing plants on Earth with individual stalks sprouting from a vast root system. Unlike most tree species when cut, one bamboo stalk cut down will regenerate naturally many more stalks from the existing root system. Disdero Lumber is excited to help provide and promote this sustainable environmentally friendly renewable resource. With a 20 year limited warranty and class A fire rating your Dasso Bamboo deck will last a lifetime.
