

Lock-Deck is a structurally engineered product of two to five kiln-dried lumber laminations bonded together with an exterior waterproof adhesive to form glue-laminated decking. It is commonly used in Heavy Timber construction as well as wood frame and hybrid systems.

Lock-Deck's decking is used for ceilings and roofs, as well as for balconies, mezzanines and floors. With Lock-Deck, extraordinary designs can be created for homes, churches, offices and other structures. Lock-Deck laminated decking provide a strong, dimensionally stable decking with all the beauty and warmth of natural wood. Please go to www.lockdeck.com for more information and available products.
